

Camera of the UAV

a small second picture beside the video, 8 looks a second

previous look

this look

their difference

movement taken out

what moved

Report

where, how strong,
since when: a few
hundred bytes of text

① tiles of the two looks are correlated:
shift, turn and zoom of the camera

*every edge of the
scene differs*

② previous look put
onto this one

③ above the noise,
twice in a row

Ground station: dashed boxes
on the live view, event log

PHOTO ON MOTION: a sealed
photo when movement begins

SENTRY: the camera watches,
no video is sent, only the reports

AES-256-GCM

status stream of the link
